

Southern Shield

Good/ Best Practice feedback

Nature of works

Alternative fuel

Date of good practice note

March 2017

EcoPar

Description of the good practice

- EcoPar is particularly suitable in poorly ventilated areas, where machine operators would be subject to large amounts of diesel emissions compared to the available fresh air supply such as tunnels, building sites, car parks and warehousing.
- EcoPar is an ultraclean fuel for regular diesel engine.
- Compared to diesel fuel, emissions of the many carcinogenic substances are decreased by more than 90%.

What are the benefits?

- An immediate significant improvement in health, safety, environmental and air quality conditions for staff and contractors.
- A complete eradication of harmful diesel particulate matter in the workplace.
