Good/ Best Practice feedback

Nature of works

Illuminated Vehicle Wrapping

Date of good practice note

April 2018

Illuminated Vehicle Wrapping

Description of the good practice

High performance illuminated safety graphics; increases the safety of site personnel and visibility of plant.

What are the benefits?

- Prismatic - retroreflective properties.
- Fully compliant to Chapter 8 of the Traffic Signs Manual. This specifies chevron safety markings and lighting in order to be safety compliant.

Many organisations have adopted these guidelines as best practice and will only allow Chapter 8 compliant vehicles onto their work sites

- Fully compliant to RIS-1530-PLT & RIS-1710-PLT.
- Network Rail PADS approved.
- Can be any colour and cut to any size or shape.
- 2mm thick.
- 80,000 hours lifespan.

- Robust and waterproof.
- Solid and Flashing modes.
- 12 volts or 24 volts.
- Wireless controller, Light sensor and on or off switching.
- Factory fitted or bespoke.

Are there any drawbacks?

No- Product outlasts the duration of the Vehicle lease.
