

Route to Gold

What is Construction Route to Gold?

Route to Gold is a performance measurement initiative within the Southern Region Capital Delivery supply chain. The initiative aims to promote collaborative working behaviours, reduce costs caused by re-work and embed a culture of continuous improvement within the rail industry.

Period 11's second-highest scoring site

Bracewell Road Embankment is the second-highest scoring site for Period 11.

Tim Naisbitt, Senior Site Manager, said:

"The success of Bracewell Road Embankment is testament to the engagement of the management team, our workforce and our subcontractors who have all contributed towards this achievement. The team have managed to deliver on schedule, in very difficult circumstances, a simple scheme in a complex and difficult environment.

The Bracewell Road family embraced the Network Rail 'What Safety Means to Me' initiative and a host of our own, including supporting a school placement, improving wellbeing, improving biodiversity and minimising the impact on the environment."

Tom Harris, Construction Manager said:

"I am really proud to be working with the Bracewell team. The team has embraced safety initiatives and the Southern Shield and has surpassed what was expected of them, considering what a difficult project it has been and their proximity to our lineside neighbours. Here are some of the things they have done to make life better for those living near the works."

- They ensured that there was plenty of signage in line with the southern shield, showing direction of train lines, speed location information and other details
- They also supplied solar powered panels, which delivered power for the site more sustainably and in a more environmentally friendly way
- They supplied a solar powered welfare unit outside the site for the night-time security guard, who was patrolling the area around the homes every night
- They even went out and bought some flowers to plant in a flowerpot found buried in the undergrowth on site to cheer up the workforce on their breaks
- They put a good traffic management system in place for a difficult worksite, which had an entrance on a bend - the only area that we could get access to the site - and have managed it very well, considering the tremendous amount of HGV movement, both in and out of the site. This had the added risk of a large amount of dog walkers going past the entrance, with most people walking three or four dogs at a time

GOLD SITES

Costain
Gatwick Airport station

BAM Nuttall
Bracewell Road Embankment
Hassocks Embankment
Balcombe Embankment

SILVER SITES

BAM Nuttall
Wadhurst Tun. Portal Cuttings
Thanet Parkway
Oxted Viaduct
Eastbourne Pit & Shed
Bramdean Substation
Bridge 13 13A

Osborne Infrastructure Ltd
New Milton Substation
Lymington Junction Substation
Beaulieu Station
Fareham Tunnel No 2 Cutting
Fulwell Substation Substation

Top scoring sites by Route are:

Sussex	Gatwick airport station	Costain
Kent	Wadhurst Tun. Portal Cuttings	BAM Nuttall Limited
Wessex	New Milton Substation	Osborne Infrastructure Limited
